APPENDIX A: ORIGINAL CODEBOOK

NATIONAL YOUTH SURVEY [UNITED STATES]: WAVE IV, 1979

PLEASE NOTE: See the codebook which begins on page 3 for the
             appropriate column locations for the data.

             The variable names in the re-formatted codebook,
             (the codebook which begins on page 3), have been
             assigned sequentially, (i.e., V1, V2, ..., VN).
             For matching purposes, the variable labels in the
             re-formatted codebook include the original variable
             names (i.e., Y4-1, Y4-2, ..., Y4-N).

     ASPIRATIONS/CURRENT SUCCESS - Questionnaire items 77 through 100
ask respondents about a variety of social, family, and educational
goals.  Each question consists of 2 parts.  The first asks how
important each goal is to the respondent; the second asks how well
s/he is doing at that goal. For scaling, items are scored so that a
higher score reflects greater importance and greater success.

     SELF-REPORTED DELINQUENCY - Questionnaire items 257 through 307
ask respondents to report the frequency with which they engaged in
each of a variety of behaviors (both deviant and positive social
behaviors) during the previous year.  Each question consists of two
parts.  The first asks for an absolute frequency of each behavior;
the second asks for an estimate of the rate of occurrence of the
behavior on a 6-point scale for initial responses indicating a
frequency of 10 or more.  When the frequency scores are less than 10,
the rate scores 1, 2, 3 result from a fixed scoring rule from the
frequency response.  Items are scored so that a higher score reflects
greater frequency or rate of involvement in each behavior.  In
addition, sets of various supplementary questions are included to
describe the most recent incident.  Based on the supplementary
information, the nature of the most recent incident reported was
classified as inappropriate (behavior that did not fall into the
offense category), appropriate but trivial (behavior was so trivial
that official action would not have resulted), or appropriate and
serious.

     DRUG OR ALCOHOL USE - Questionnaire items 310 through 325 ask
respondents about a number of substances they may have used in the
past year.  For each substance used one or more times, the respondent
is asked for an estimate of the rate of use on an 8-point scale.  If
the respondent volunteered a comment that use was limited to a short
period of time during the reference year, an episodic usage code was
included.

INFORMED YOUTH CONSENT FORM

DESCRIPTION OF STUDY

The Behavioral Research Institute of Boulder, Colorado, is
continuing its national study of American youth.  This study will
give us information on the extent and types of delinquent and
conforming behavior of American youth, as well as information on the
causes of this behavior.  This information will help us understand
delinquency and plan better programs for youth.

PARTICIPATION REQUIREMENTS AND GUARANTEES

As in previous years, each interview will last one hour, and you
will be paid $5. You are free to choose whether or not to continue in
this study.  If you wish to end your participation at any time during
the study, you are free to do so.  Some of the questions asked in the
interview may seem very personal.  If you have any concern or worry
about your answers to these questions, we promise you that your
answers to all questions will be seen only by members of the
Institute staff, and that no one will match your name with your
answers.  YOUR NAME WILL NOT APPEAR ANYWHERE ON AN INTERVIEW.  Your
name will be kept apart from your interview information and all names
will be kept in a safe and will be destroyed once the study is over.
At that point, all young people who took part in the study will
become anonymous even to the Institute staff.  Finally, we promise
you that your answers can never be used against you in any legal
action.

You are welcome to look at copies of the questions to be asked
of you (the Youth Interview Schedule) and written statements from the
Behavioral Research Institute and U.S. Government which explain what
taking part in the study involves.  One of these written statements
is the Special Assurance for the Protection of Human Subjects
Agreement with the U.S. Department of Health, Education, and Welfare.
The assurance agreement spells out in more detail the promises for
keeping your answers secret and the importance of the study.  The
other written statement, the Certificate of Confidentiality from the
Department of Health, Education, and Welfare, promises you that no
information you give BRI will be given to any other person or agency
without your written consent.

The interviewer will be happy to answer any questions you might
have about taking part in this study.  Each youth in the study will
be given a copy of this form (the Consent Form).  If you have any
questions later on, you may call or write:

                                    CONSENT

     I have read the above description of the National Survey of
Youth and the participation requirements and guarantees.  I
understand the procedures to be followed and the guarantees of
confidentiality for all information I provide.  It is also my
understanding that participation is voluntary and that I may stop
participation in this study at any time.  I have been given an
opportunity to examine the interview schedule, BRI's Special
Assurance Agreement with the U.S. Department of Health, Education,
and Welfare, and BRI's Certificate of Confidentiality from the
Department of Health, Education, and Welfare.
